# DAILIES TOTAL 1®

The award winning DAILIES TOTAL1<sup>®</sup> are the first and only water gradient contact lenses that offer patients exceptional all day comfort<sup>1</sup> and excellent breathability.<sup>2,°</sup>

# **DAILIES TOTAL1°**

### THE SCIENCE

DAILIES TOTAL1<sup>®</sup> is the first water gradient contact lens featuring a 33% to 80% increase in water content from core to surface.<sup>3,4,†</sup>

### THE BENEFIT

Offers patients exceptional comfort<sup>1</sup> - 9 out of 10 subjects in a clinical study agreed that DAILIES TOTAL1<sup>®</sup> are so comfortable that they feel like they are wearing nothing.<sup>5</sup>

### PERFECT FOR

Patients who want comfortable contact lenses from the moment they wake up until when they go to bed.<sup>1</sup> They want the best and refuse to compromise.

### THE SCIENCE

DAILIES TOTAL1<sup>®</sup> Multifocal features a Precision Profile<sup>™</sup> lens design for a smooth progression of power gradients.<sup>6</sup> SmarTears<sup>™</sup> helps stabilise the tear film to provide continuous moisture throughout the day and help to restore the lipid layer where needed.7

### THE BENEFIT

Offering patients seamless vision at all distances and exceptional comfort from the beginning to the end of the day.<sup>1</sup> This easy-to-fit lens has a 96% first fit success rate.8

<sup>†</sup>In vitro measurement of unworn lenses.

PERFECT FOR

The specific vision needs of people affected by presbyopia who want quality without compromising.

### DAILIES TOTAL1® 13

Offering clear vision and refreshing comfort with every blink,<sup>9</sup> DAILIES® actively release moisture all day long,<sup>10</sup> making them the perfect fit for part-time or full-time wear.

# DAILIES®

# **DAILIES° AquaComfort PLUS°**

# **DAILIES**<sup>°</sup> AquaComfort PLUS<sup>°</sup> Toric

### THE SCIENCE

Contains 3 moisturising agents including HPMC<sup>11</sup> for instant comfort upon application, PEG and PVA blink-activated moisture for comfort throughout the day.<sup>10,12</sup>

### THE BENEFIT

Clear vision and refreshing comfort<sup>9</sup> with blink-activated moisture all day long.10

### PERFECT FOR

New daily contact lens wearers seeking advanced comfort<sup>9</sup> each and every day.

### THE SCIENCE

The Precision Curve<sup>™</sup> lens design provides outstanding stability and crisp, clear vision13 with blink-activated moisture.9

### THE BENEFIT

The design works with the natural blinking action of the eyelids to keep the lens balanced, providing consistent, crisp and clear vision.<sup>13</sup>

PERFECT FOR

New daily contact lens wearers seeking crisp vision with refreshing comfort throughout the day.<sup>9,10</sup>

# DAILIES<sup>®</sup> AquaComfort PLUS<sup>®</sup> Multifocal

# Focus<sup>®</sup> DAILIES<sup>®</sup> All Day Comfort<sup>™</sup>

### THE SCIENCE

Precision Profile<sup>™</sup> lens design for crisp clear vision at all distances<sup>14</sup> with blink-activated moisture.

### THE BENEFIT

Seamless vision from near to far<sup>14</sup> and refreshing comfort all dav.9,10

### PERFECT FOR

Providing satisfaction to patients through different stages of their presbyopia.

### THE SCIENCE

The first lens with PVA moisture release technology to offer patients blink-activated, sustained moisturise release.<sup>12</sup>

THE BENEFIT

Continuous lubrication for improved end-of-day comfort.<sup>10</sup>

### PERFECT FOR

Patients seeking cost effective contact lenses which leave eyes refreshed and revitalised.9

### Focus<sup>®</sup> DAILIES<sup>®</sup> All Day Comfort<sup>™</sup>

Designed for consistent comfort all day,<sup>15</sup> every day, AIR OPTIX® harness innovative SmartShield<sup>®</sup> Technology that creates an ultra-thin protective layer to guard lenses from deposits<sup>16,17</sup> – keeping them cleaner for longer.<sup>17</sup>

# AIR OPTIX<sup>®</sup> plus HydraGlyde<sup>®</sup>

# AIR OPTIX<sup>®</sup> plus HydraGlyde<sup>®</sup> for ASTIGMATISM

### THE SCIENCE

Enveloped in HydraGlyde<sup>®</sup> Moisture Matrix for longer lasting moisture benefits and improved wettability.<sup>18</sup> Superior lipid deposit resistance with SmartShield<sup>™</sup> Technology.<sup>16</sup> This lens is designed for consistent comfort from day 1 to day 30.19,20

### THE BENEFIT

Outperforms leading competitors with improved patient comfort due to longer-lasting wettability.15,±,\*

### PERFECT FOR

Patients seeking a monthly contact lens that feels clean, comfortable and hydrated all month long.<sup>19,20</sup>

### THE SCIENCE

Enveloped in HydraGlyde<sup>®</sup> Moisture Matrix for longer lasting moisture benefits and improved wettability.<sup>18,\*</sup> Outstanding stability and fit success with unique Precision Balance 8|4<sup>™</sup> design.<sup>21</sup>

### THE BENEFIT

HydraGlyde<sup>®</sup> Moisture Matrix lenses stay clean and comfortable for the whole wearing cycle and feel more hydrated at the end of the day.<sup>19,20</sup> Less than 5° of oscillation with each blink ensures reliable, consistent visual acuity.<sup>21,\*\*</sup>

PERFECT FOR

Patients seeking excellent visual acuity and consistent vision from day 1 to day 30.15,20,\*\*

# AIR OPTIX<sup>®</sup> plus HydraGlyde<sup>®</sup> MULTIFOCAL

# **AIR OPTIX° NIGHT & DAY° AQUA**

### THE SCIENCE

Smooth progression of power from centre-near to intermediate and distance with Precision Profile<sup>™</sup> lens design for crisp, clear vision at all distances.<sup>14,\*\*\*</sup> Also features HydraGlyde® Moisture Matrix, an innovative, proprietary reconditioning agent that embeds in the contact lens.

### THE BENEFIT

HydraGlyde<sup>®</sup> Moisture Matrix keeps contact lenses clean and comfortable for the whole wearing cycle and feeling more hydrated at the end of the day.<sup>19,20</sup>

### PERFECT FOR

Emerging and established presbyopes who seek crisp, clear vision at all distances near through far.<sup>14,\*\*\*</sup>

### THE SCIENCE

Highest level of oxygen transmissibility of any available soft contact lens.<sup>23</sup> Approved for up to 30 nights continuous wear.<sup>23</sup> SmartShield<sup>™</sup> Technology provides clean and consistently comfortable vision from day 1 to day 30.19,23,‡

### THE BENEFIT

High breathability ensures maximum oxygen transmission and takes into account that no two corneas respond alike.<sup>23</sup> Ultra-smooth lens surface designed to defend against daily deposits for comfortable wear all day long.<sup>16,17</sup>

\*\*\*Based on AIR OPTIX AQUA MULTIFOCAL.

PERFECT FOR

The most breathable soft contact lens for patients who lead busy lives, and nap or sleep in their contact lenses.<sup>23,‡</sup>

\*AIR OPTIX® NIGHT & DAY® AQUA lenses are approved for daily wear and for up to 30 nights' continuous wear. Not everyone can wear lenses for a full 30 nights. Eye care practitioner must be consulted.

# **AIR OPTIX<sup>®</sup> AQUA**

Alcon<sup>a</sup> Novartis company

### THE SCIENCE

Up to 5 times greater oxygen transmissibility than traditional soft contact lenses.<sup>23</sup> SmartShield<sup>™</sup> Technology provides clean and consistently comfortable vision from day 1 to day 30.<sup>19, △</sup>

### THE BENEFIT

Ultra smooth lens surface designed to defend against daily deposits<sup>16,17</sup> for comfortable wear all day long.<sup>19,24</sup>

### PERFECT FOR

Patients who seek a healthy, natural feeling and comfort all day, every day, and for the whole wearing period.<sup>15,  $\Delta$ </sup>

### THE SCIENCE

Features a breakthrough Precision Balance 8|4<sup>™</sup> design<sup>21</sup> combined with a highly breathable silicone hydrogel material.<sup>23</sup>

### THE BENEFIT

Provides astigmatic patients with improved levels of comfort, visual acuity,<sup>19,\*\*</sup> and outstanding stability, resulting in 98% of these lenses having acceptable or optimal fit at dispensing.<sup>21</sup>

PERFECT FOR

Patients seeking a breathable<sup>23,\*\*</sup> monthly contact lens that delivers exceptional visual acuity and comfort all month long.<sup>19,\*\*</sup>

# **AIR OPTIX° AQUA MULTIFOCAL**

### THE SCIENCE

Precision Profile<sup>™</sup> lens design for crisp, clear vision at all distances.<sup>14</sup>

### THE BENEFIT

Bi-aspheric surface design enhances image quality and results in 98% fit success rate.<sup>8</sup>

### PERFECT FOR

Presbyopic patients seeking a breathable<sup>23</sup> monthly contact lens that provides clear vision at all distances.<sup>14</sup>

Preservative-free peroxide solution

3% Hydrogen Peroxide, Phosphonic Acid (stabilizer), Sodium Chloride, Phosphate (buffer system), Poloxamer (surfactant), HydraGlyde® Moisture Matrix, (EOBO-21 – Polyoxyethylene-Polyoxybutylene), Coated Disc (AODISC)

At expiry date or 3 months after opening

Starter Kit: 90ml; Single Bottle: 360ml; Twin Pack: 2x360ml; Value Pack: 3x360ml + AIR OPTIX® contact lenses 3 month Value Pack: 3x360ml with 2x3 month AIR OPTIX® Packs 6 month Value Pack: 6x360ml with 4x3 month AIR OPTIX® Packs

Hydrogen Peroxide-based deep cleaning using built in surfactant poloxamer

Suitable for use with soft and RGP lenses, ideal for silicone hydrogel lenses

# Systane Family of Products

A range of tailored solutions that provide long lasting relief for evaporative and aqueous deficient dry eye patients."

# Systane<sup>®</sup> BALANCE

### THE SCIENCE

Lipid-containing dry eye drop designed to restore the lipid tear component to enhance tear film stability and protect the ocular surface.<sup>42</sup>

### **THE BENEFIT**

Provides long lasting relief from evaporative dry eye symptom, which can be caused by Meibomian Gland Dysfunction (MGD), such as burning and irritation. Signs of MGD and patients' quality of life can be improved in just 4 weeks.<sup>43</sup> Helps to restore the lipid layer and can protect the surface of the eye.<sup>42</sup> Once opened it can last up to 6 months. Can be used before and after, not whilst wearing contact lenses.

# PERFECT FOR

Extended protection and fast symptom relief, leaving patients' eyes feeling comfortable.<sup>42</sup>

# Systane<sup>®</sup> ULTRA

### **THE SCIENCE**

Helps restore the tear film and provide long lasting protection. The viscoelastic properties help prevent contact lens-related dry eye.<sup>42,44</sup>

### **THE BENEFIT**

Helps dry eye associated with aqueous and mucin layer deficiency. Contact lens friendly. Once opened it can last up to 6 months.<sup>42,44</sup>

### **PERFECT FOR**

Extended protection and fast symptom relief, leaving patients' eyes feeling comfortable.<sup>42</sup>

# Systane<sup>®</sup> GEL DROPS

፞፞፞፞፞

THE SCIENCE

from future damage.46

### **THE BENEFIT**

Helps dry eye associated with aqueous and mucin layer deficiency.<sup>45</sup> Designed to provide protection against the symptoms of moderate to severe dry eye. It offers the convenience of a drop with the protection of a gel. Once opened it can last up to 3 months. Can be used before and after, not whilst wearing contact lenses.

An intensive gel shield for extended protection and enduring

relief. Allows the cornea to heal and provides protection

### PERFECT FOR

Night-time use or extra daytime protection for long lasting relief.<sup>45</sup>

# Systane<sup>®</sup> LID WIPES

### **THE SCIENCE**

Designed to complement the Systane® family of eye drops.

### **THE BENEFIT**

Can be used before washing the face or during a daily cleansing routine to help remove debris and reduce eye irritation. Individually wrapped for easy transportation and to maintain sterility. They are also hypoallergenic and soothing for even the most sensitive eyes.

### **PERFECT FOR**

Promoting good eye hygiene and eye health to your patients.

# **GENTEAL®** Tears

GENTEAL® Tears Family of Products for Dry Eye Symptom Relief.

### THE BENEFIT

It's formulated to provide lasting protection against further irritation due to dryness of the eye while delivering fast, soothing relief from burning and irritation. Its unique combination of ingredients can help provide relief of dry eye symptoms

# PERFECT FOR

When computer eye strain, windy and sunny outdoor conditions, or tiredness cause temporary dryness of the eye, restore comfort with one of these.

Alcon

### THE SCIENCE Tears Naturale

Tears Naturale contain Hydroxypropyl Methylcellulose which belongs to a group of medicine called artificial tears.It's similar to natural tears.

Tears Naturale®II

### THE BENEFIT

It is used to relieve dry eye conditions and provides temporary relief from burning and discomfort due to dryness of the eye.

### PERFECT FOR Moistening hard le

Moistening hard lenses and lubricating eyes. (e.g., condition associated with the use of visual display units, infrequent blinking, certain medical treatments, atmospheric pollution and dry atmospheres)

# Alcon See Brillantly

### MULTIFOCAL

# **Multifocal Fitting Guidelines** To ensure the best visual performance at all distances

Please start with a new refraction aiming for the minimum ADD, to ensure best visual performance at all distances.

### **INITIAL** LENS SELECTION

- Determine vertex-corrected, least minus/most PLUS, spherical equivalent distance Rx and add +0.25 binocularly.
- Determine initial ADD (LO, MED, HI) based on the chart to the right.

ADD SELECTION		
MINIMUM ADD	BOTH EYES	
UP TO + 1.25	LO	
+1.50 to +2.00	MED	
+2.25 and over	H	

### **DISTANCE** OVER REFRACTION

- Perform binocular and monocular over-refraction.
- Check near vision quality with everyday objects.
- If not 0.00, move to the new trial lenses.
- Dispense trial lenses wearer now needs to experience "real world" vision for approximately one to two weeks.

### TORIC

# **DAILIES**<sup>®</sup> **AquaComfort PLUS**<sup>®</sup> **Toric Fitting Guidelines** 4 easy steps to a successful fit

# 1 SELECT INITIAL CONTACT LENS

Upon completion of the refraction, use the **Spectacle to Contact Lens Power Grid**<sup>\*</sup> chart to select your initial trial contact lens power.

### **Contact Lens Axis:**

- Select the axis for DAILIES® AquaComfort PLUS® TORIC contact lenses closest to the spectacle axis – 10°, 20°, 70°, 80°, 90°, 100°, 110°, 160°, 170°, 180°.
- Allow the contact lens to settle on the eye.

 a) Assess centration:
A well-fitted contact lens will have full corneal coverage with good centration.

b) Assess contact lens movement:

A well-fitted contact lens will show sufficient movement to allow tear exchange under the contact lens during blinking, primary or upgaze.

c) Assess push-up test:

Using lower eyelid, push the contact lens upwards. A well-fitted contact lens is easy to displace, and returns smoothly to the centred position when released.

### **3** EVALUATE INITIAL CONTACT LENS ORIENTATION

### Tips for viewing the scribe lines:

- a) Narrow the slit lamp beam.
- **b)** Confirm the light beam passes through the centre of the pupil. Scribe lines are located at 3 and 9 o'clock.
- **c)** Determine the amount of rotation, if any, and compensate accordingly.
- NOTE: "OK" Inversion Indicator may orient either in the 6 or 12 o'clock position.

\*Determination of final cylinder axis to order will be made after compensation for lens orientation.

### **EVALUATE VISUAL ACUITY**

Check visual acuity and perform a spherical over-refraction if necessary. If the spherical over-refraction does not yield acceptable vision, perform a spherocylindrical over-refraction.

Visit www.myalcon.co.uk for more details.

### Fitting Guides & Power Grids

### TORIC

# **AIR OPTIX**<sup>®</sup> for ASTIGMATISM Fitting Guidelines 4 easy steps to a successful fit

# SELECT INITIAL TRIAL CONTACT LENS

Upon completion of the refraction, use the Spectacle to Contact Lens Power Grid<sup>≠</sup> chart to select your initial trial lens power.

### Lens Axis:

- Select the axis for AIR OPTIX<sup>®</sup> for ASTIGMATISM soft contact lenses closest to the spectacle axis. These contact lenses come in axes around the clock in 10 degree steps.
- Allow the contact lens to settle on the eye for 5 to 10 minutes.

# **EVALUATE CONTACT LENS FIT**

### a) Assess centration:

A well-fitted contact lens will have full corneal coverage with good centration in primary, up and side gaze.

### b) Assess contact lens movement:

A well-fitted contact lens will show sufficient movement to allow tear exchange under the lens during blinking, primary or upgaze.

### c) Assess push-up test:

Use the lower lid border to push the contact lens upwards. A well-fitted contact lens is easy to displace, and returns smoothly to the centred position when released.

### **EVALUATE VISUAL ACUITY** 3

On rare occasions, the fitting might result in a reduced visual acuity.

### a) First, do a spherical over refraction.

A well-fitted contact lens will have full corneal coverage with good centration in primary, up and side gaze.

- b) Check for too much minus power first (plus over refraction) and then for too little minus (minus over refraction).
- c) If adding plus or minus lenses improves acuity, use a new trial contact lens with the adjusted sphere power or dispense a pack with this power. If acceptable vision cannot be achieved, check for rotation and compensate accordingly when selecting the next trial contact lens.

for ASTIGMATISM

Alcon

HydraGlyde<sup>®</sup>

### **EVALUATE INITIAL CONTACT LENS ORIENTATION**

### Tips for viewing the scribe lines:

Narrow the slit lamp beam. Confirm the light beam passes through the centre of the pupil. Scribe lines are located in the area from the limbus to the pupil at 3, 6 and 9 o'clock (with the 6 o'clock being a bit wider than the other two). Determine the absolute amount of rotation, if any, and compensate accordingly using the LARS/CAAS card.

AIR OPTIX® for ASTIGMATISM contact lenses achieve rotational stability on eye in just 30 seconds.
